

Stanford Brain Development Project

Brain Imaging Research on **COGNITIVE CONTROL** in Attention Deficit Hyperactivity Disorder

Do you have a child with Attention Deficit Hyperactivity Disorder (ADHD)? If so, join the Stanford Brain Development Project, and help us learn about the brains of **children with ADHD!** We are also looking for **typically-developing children** to participate.

We are currently seeking children...

...ages 9-12

...right handed

...do **NOT** have braces or other non-removable metal in their mouth/body

Participation involves 2-3 visits total: one to two clinical and neuropsychological assessments and one MRI scan (a safe, non-invasive procedure that does not use x-rays or radiation). During the MRI scan, children will play games while pictures of their brain are taken.

Eligible children can receive \$100-\$160 upon completion of the study and will receive pictures of their brain to take home!

For more information, visit our website: braindevelopment.stanford.edu/

If you are interested in participating or have questions, please contact Rachel at braindevelopment@stanford.edu or at (650) 723-3724. We are happy to chat, learn more about your child, and answer your questions!

For further information regarding questions, concerns, complaints, about the research or your rights as a research study subject, please contact the Stanford Institutional Review Board (IRB) to speak to an informed individual who is independent of the research team at (650)-723-5244, call toll free at 1-866-680-2906. Or write to the Stanford IRB, 3000 El Camino Real, Five Palo Alto Square, 4th Floor, Palo Alto, CA 94306
