Cindy Goldrich, Ed.M., ACAC

- Ed.M. from Columbia University, Teachers College
- Board Certified ADHD Coach
- Certified Think:Kids Mentor
- Creator of **Calm and Connected: Parenting Children with ADHD**® Parent Coaching Workshop Series
- Author: **8 Keys to Parenting Children with ADHD**
- ADHD Parent Coach Trainer
- Speaker, Writer, Advocate and Avid Learner

Goal:

Organized learner
Efficient learner
Independent learner

7

Executive Function

The Executive Functions are a set neurologically-based skills that have to do with managing oneself and one's resources in order to achieve a goal. *How efficiently you do what you decide to do.*

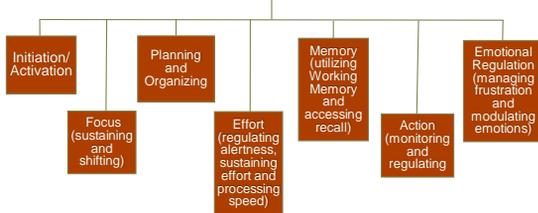

- Located primarily in the **Prefrontal Cortex** of the brain-the last part to develop
- Typically fully developed by **25 - 30 years of age**
- Often referred to as the CEO of the brain, coordinating and managing many cognitive functions

People with ADHD may be as much as **30% delayed** in their Executive Functioning Skills

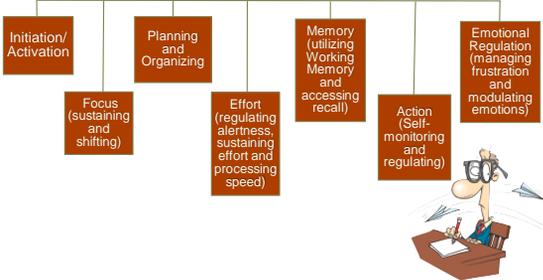

This can make learning and performing more difficult and frustrating...

8

Executive Function: The Center for Mental Control and Self-Regulation

Executive Function: The Board of Directors that helps you Do what you Decide to Do

It's not always about the Homework

Problem:

- Emotional Fuel tank depleted
- Low frustration tolerance
- Despair: Feel helpless to make it better
- Not prepared with the necessary knowledge
- Control/Independence: Need support but don't want to appear as if in need

Result:

- Avoidance, Rushing through, Endless process, Refusal
- Anger, Anxiety, Depression

**See the world
from their eyes!**

Stress: The gate keeper to learning

Negative emotions (stress, pressure, anxiety, etc.) increases hormone cortisol which dulls cognition.

The **PreFrontal Cortex** turns off and the reflexive, rapid, responses of the **Amygdala** turn on.

The brain goes into
Survival Mode.

12 Stressed Brain© Victoria Tennant Consulting

What happens when the Brain is in Survival Mode?

- ❖ Fight
- ❖ Flight
- ❖ Freeze

No learning can take place...
 No problems can be solved...
 Empathy for others becomes difficult...

13

13

Sometimes it IS about the Homework

What are the Homework Expectations:

- Is the amount reasonable given your child's profile?
- Is the level of the work reasonable for your child?
- Are they being expected to complete schoolwork that was unfinished during class time?
- Is the IEP/504 being appropriately implemented?

14

When should homework be done?

Considerations:

- Do they need a break after school?
 - How long?
 - What do they do during that break?
 - How to you make sure the break ends?
- Nutrition?
- Exercise?
- Medication?
- How much time to they need to complete their homework?
- Will they be needing support and from whom?
- When is bedtime?
- **How much say should you have in this?**

15

Provide Appropriate Support

- What are the conditions upon which you are willing to help?
 - Have they tried the problems independently?
 - Did they ask for your help appropriately?
 - Are they expecting you to DO the work for them?
 - Are they expecting you to be available at "all hours" when they decide they need help?
- Are you willing/available to be "present"
 - Some kids benefit from a "body double" to help them stay focused and reduce anxiety
- Do they know your schedule in advance - when they can rely on you?

Put all this in writing

16

Goal: Make an Agreement with your child

Agreement must cover:

- What will the parental role be during homework time
- What will be the parental role in verifying work completion
- What will happen if work is not done as per agreement
- A plan for making a written weekly schedule that includes activities, homework, personal obligations as well as parents commitments
- A plan to review and re-evaluate the plan ever 2 weeks until satisfied that things running smoothly

Work together and then write down the agreement.

17

Never let your relationship suffer at the alter of Homework!

Setting the Stage for Learning

How to organize the work environment

- What type of space do they work best in?
- Accessible/visible to supervision and or support
- Music, movement, fidgets
- Minimal distractions
- Snacks for energy and sensory needs
- A central supply closet stocked for the full school year
- Visual lists and tools (bulletin board, white board)
- Staging area for back pack, phone, keys, etc.

How much say in all of this do they have?

The Daily Homework Plan

- Having a **daily plan for when and how the actual homework** will be done creates a beginning, an ending, and an overall plan to manage the time spent on the work.
- **Planning the time and order for doing homework improves self-talk and requires active decision making.**
- Creating the plan **teaches skills:** Initiation, organization, time management, prioritizing
- **The planning also helps identify and clarify where the inherent problems may be:** knowing the expectation, having the proper materials, understanding the assignment, being "present" to do the work, caring about the work, etc.

20

Time, like money, is limited

You can't use more than you have!

21

The Pomodoro Technique

A Pomodoro is a Unit of Time - the amount of time you can comfortably concentrate before needing to take a break

- Plan out how much time you have to work
- Plan the order you will do the work
- Plan when you will take breaks (short and long)

- Helps insure that there is sufficient time allowed for the work to be completed
- Establishes short, focused, bursts of work
- Builds stamina and concentration
- Minimizes the chance of distractions taking on new direction

25

Making time Real!

- Break work into chunks of 10 - 20 minute units (Pomodoros)
- Choose the order to do the work
- After one Pomodoro, take a 5 minute break
- After 3 Pomodoros, take a 30 minute break
- Any distracting thoughts... Write them down, don't just act on them in the moment.

Time needed for homework: 110 minutes = 5.5 Pomodoros

Pomodoro	Break
20 minutes: Math problems	5 minutes
20 minutes: Read Social Studies	5 minutes
20 minutes: Answer S.S. questions	30 minutes
20 minutes: Study Science	5 minutes
20 minutes: Study Science	5 minutes
20 minutes: English assignment	DONE!
Total work time: 2 hours	Total break time: 50 minutes

26

The Computer

- Learn keyboarding by third grade
- Organization of the Desktop: folders by subject
- Software needed: word-processing, spreadsheets, presentations
- Organizing the browser: Bookmark important websites
- Making use of computer dictation and text to speech
- Know your word-processing basics:
 - Creating templates, editing, creating tables, etc.
- Restricting the internet?

27

Quiet Time for All

When the baby sleeps, mom is supposed to...?

Consider carving out a time in the day where everyone shut's off the outside world.

28

Helpful Mantras for your Child to know

- Recognize the distraction and let it go
- Respect the timer!
- Procrastinating now means loss of reward
- Don't Change the Plan - I made it when I was calm!
- Start with Wherever You Are with Whatever You Have.
John Rohn
